

Lesson 5: Communicating Eliminates Confusion

Alexis Hornbuckle

Powerful conversations include communication. Coach used to always say, communication eliminates confusion. And that wasn't just on defense. It wasn't just in the film room. It was in life.

I remember, guys, I got stories for days. I remember in a game, I had broken my wrist, came back to play, wrist still broken. And as a guard, my leadership was still important. So, she told me, it doesn't matter that you have one hand or that you can't go to your right the way that you want. You still need to set up the play. And you need to talk to your teammates about how to get to where you want them to get to help you.

Coach, I'm trying. Communication eliminates confusion as she stares through my soul with those icy blue eyes. And I knew instantly all I had to do was open up my mouth, talk, direct, and be a leader. Communication can solve a whole lot of problems.
